

## E-DISCOVERY SOLUTIONS

Mangalam transforms the way law firms and corporate legal departments around the world manage their electronic discovery processes. Legal proceedings need information to be churned out from terabytes of data, and meeting stern deadlines while maintaining the quality and accuracy of abstracts becomes challenging. This is where Mangalam, one of the most renowned Electronic Discovery companies makes the difference. As part of our e-Discovery services, we streamline the litigation processes and ensure that all the relevant information is properly analyzed and produced.

Our E-Discovery team comprises of trained professionals capable of working on all industry standard software tools.

**Our Training & Development team has the capabilities to train employees on new software so that we can meet the client's specific requirements.**

### Law Prediscovery

On an average, we process over 3000 GB of data every year for the last 10 years as part of E-Discovery services.

### IPRO eCapture

Mangalam uses two processing tools during the IPRO eCapture process. Our IPRO eCapture support services include: eCapture Controller & eCapture QC.

### Relativity

Mangalam uses the latest Relativity processing engine to filter and process client's data without it leaving the Relativity platform.

Our clients include some of the largest national litigation support service providers and law firms in the US, Canada, Australia and UK. Our complete portfolio of services and technologies spans all phases of the Electronic Discovery Reference Model (EDRM), offering integrated solutions that deliver end-to-end support for capturing, processing, analysis, hosted review and the client's preferred blend of onshore, offshore and on-site document review.
